Graduate student in Software Engineering nearing degree completion, with hands-on experience developing backend services, full-stack applications, and research tools. Practical background working with C#, C++, Java, JavaScript, TypeScript and cloud technologies through internships, coursework, and academic projects.

EDUCATION:

Rochester Institute of Technology
Golisano College of Computing and Information Sciences
Master of Science in Software Engineering
Bachelor of Science in Game Design and Development

Rochester, NY

Expected May 2026 (GPA 3.85)
May 2023 (GPA: 3.97)

SKILLS:

Programming Languages: C#, C++, JavaScript, TypeScript, Java, YAML, SQL, Python, Kotlin

Technologies: Visual Studio, Visual Studio Code, Git, GitHub, Slack, React, Trello, Jira, Azure DevOps
Windows Subsystem for Linux, AWS, Azure, Docker, Terraform

EXPERIENCE:

Wegmans Food Markets
Software Engineer Intern

June 2025 - Present

- Developing backend services that power the browse and search experience for Wegmans customers across the website and mobile app.
- Implementing and refactoring business logic and legacy components, improving maintainability and reliability of existing systems.
- Enhancing Infrastructure-as-Code using Terraform, enabling consistent provisioning of cloud resources and supporting reproducible deployments.
- Maintaining and improving API configurations using OpenAPI specifications and CI/CD pipelines built with GitHub Actions.
- Working within Azure-hosted microservices, gaining experience with Azure App Services, storage solutions, monitoring tools, and messaging systems used at enterprise scale.
- Collaborating on an Agile/Scrum team using Azure DevOps; participating in daily standups, backlog refinement, sprint planning, and cross-team coordination.

Rochester Institute of Technology
Graduate Research Assistant

Rochester, NY
August 2024 - May 2025

- Collaborated with university faculty to design and implement an extension for Visual Studio Code aimed at helping developers create more effective and readable code identifiers.
- Built a C++ server to analyze source code and generate identifier recommendations, adhering to Language Server Protocol (LSP) standards for seamless integration with Visual Studio Code.
- Implemented JSON-based data exchange between the backend server and a frontend TypeScript client to ensure real-time communication.

Rochester Institute of Technology
Teaching Assistant

Rochester, NY
August 2021 – May 2023

- Selected by professor of Game Development & Algorithm Problem Solving I & II.
- Facilitated comprehension of .NET Framework C# for over 50 students by providing debugging support and constructive feedback on programming projects.
